FRONT END JAVASCRIPT DEVELOPER IN HIGH GROWTH VENTURE TECH

Location: London

Salary: £60,000-80,000 per annum

Job Description

This is an opportunity to work in a well funded tech startup that has become a market leader in a £4 billion market within 4 years! Backed by leading VCs, angels & founders and managed by a team with 50+ years’ experience scaling businesses they understand their two-sided marketplace better than anyone else on the planet and are using technology to disrupt how their industry works.

Having already reached 100,000 5* customer reviews, profitability & are scaling 2-3x every year; they have more awards and press coverage than they have the shelf space for! They are far from done too, there is a huge opportunity ahead with a target to build the business to £100m+ revenue in the next 3-5 years; but they will need your help!

If you are:

- Someone with at least 2 years solid front end javascript coding experience (Angular preferable)
- Keen to make software that people will use every single day to make their lives easier?
- Excited to work on greenfield projects with responsibility and independence?
- Able to pick the right tool for the job, and learn new frameworks quickly?
- Meticulous about quality, and gifted with a strong desire to write beautiful code?
Then this is the job for you, read on and apply now for more information!

The current technology stack (open to improvements and suggestions):

- Python on the server side, using Django as a web framework, and Django Rest Framework for our API
- PostgreSQL for our database, using some of its advanced geographic modelling capabilities
- Angular on the clientside
- A hybrid mobile app developed using Ionic on top of Cordova

If you meet the above requirements, please send your CV to anettemberg@icloud.com
