We are on a journey to Smart Manufacturing - developing fully connected, digitalized and automated production technologies based on internet of things, big data analytics, visualization, cloud computing, 5G mobile connectivity and augmented reality. We have following open internship positions at our AR project team:

**Augmented Reality / Software Developer** to develop the AR app
Expectations and skills:
- BSc in Computer Sciences / Engineering
- Unity development platform
- Vuforia software development kit
- Mobile operating systems (e.g. Android, Windows 10)

**Mechanical Engineer** to develop the physical workstation
Expectations and skills:
- BSc in Engineering
- Physical product development and prototyping
- Ergonomics and workplace design
- Knowledge and interest in testing and trying different mobile devices and AR hardware

**Technical Project Manager** to support and drive the project
Expectations and skills:
- BSc in Engineering / BA in Management
- Basic understanding of software/hardware development
- IoT and connectivity technologies
- Manufacturing processes
- Agile frameworks and project management

We offer:
- Paid internship 3-6 months
- Possibility to combine studies and internship
- Personal adviser
- Participation in global development project in a multicultural team
