We belong to the Digital Enablement and Information Technology teams. Transforming the CEMEX Way of working through digitalization is our key priority. Located in Prague, we maintain a global impact and a multicultural mentality.

Are you up for a challenge?
We are looking for:

Global Cement Operations Professional

Why CEMEX?
This is a great time to be at CEMEX as we are well-positioned to grow and succeed. We are a dynamic organization that provides great development opportunities for employees because we recognize that our people are our best advantage.

We are passionate, energetic people who love challenges and learning. Our team is integrated from a diversity of backgrounds that allow us to be creative in solutions. We work and coordinate projects as a chain, with every link being crucial in creating value for the business and our customers.

At CEMEX, we are not just building the future, we are building a better future.

What do we offer YOU?
- An intensive development program with challenging assignments that will allow you to learn by experience
- You will be part of a selected pool of professionals, the primary source of talent addressing complex projects in various parts of the world
- Company covered travel & cost of living expenses during your temporary relocation to Mexico as well as while you are on assignment
- Paid home-leave every 3 months

What you will be doing?
You will learn the operational aspects of our production technology. This program will allow you to develop your technical and leadership skills by actively participating in several development projects in various parts of the world.

The program consists of three development stages:
1) Temporary relocation to Mexico to actively participate in the development program at Planta Huichapan
2) Go through 2-3 assignments in different maintenance or expansion projects throughout any of our CEMENT Plants worldwide
3) Return to your home Business Unit to continue developing in a full-time assignment in a local role

What do you need for this position?
- Fresh graduate from a technical university
- Analytical skills
- Process oriented mindset
- Problem solving skills
- Self-study and research skills
- Leadership, proactiveness, self-management, conflict resolution
