ANNEX 2

Eligibility criteria:

1) Have at least a Bachelor degree or be a student in the last semester of the Master or having graduated in the 12 months before the start of the placement.

2) Be able to translate into their A\(^1\) language (which must be an official EU language) from two other European Union's official languages, one of which must be English, French or German;

3) Not having been on a traineeship longer than six weeks in a European Union institution or body.

Citizenship: It is highly recommended that students hold an EU citizenship. Other nationalities are subject to security checks, which may take long and lead to reduced access to resources.

Working languages: For practical reasons, it is recommended that trainees have a high level of English as B\(^2\) language, since a vast majority of texts translated are English originals. For students with English as A language, the B and C\(^3\) language can be any of the official languages of the European Union\(^4\). Before selecting, it is recommended that universities/trainee discuss with the relevant LD about useful combinations of B and C languages.

Additional information:

- The trainees receive no payment or other kind of cost compensation.
- DG T cannot insure students against sickness or accidents.
- It happens that colleagues in the LDs can host a student. The university/trainee can contact the LDs to see whether this is the case.
- The students' work during their placement remains the property of the Commission. All intellectual property rights which can be waived will be waived.
- EMT students/graduates should have preference over students from non-EMT study programmes.
