MAIN BUSINESS OBJECTIVES:

As a fast-growing business, we need sharp and committed individuals, who are ready to take the next challenge in their career. We are looking to expand and strengthen our analytical competences with a very intelligent Business Analyst, Data Master to support our business intelligence efforts in the Scandinavian and Baltic region. This exciting role will be based out of Tallinn, Estonia. This role is designed for applicants who range in years of expertise from novice to senior; the most important qualities which will outweigh experience, are intellect, business aptitude, problem solving skills and investigative qualities.

ESSENTIAL DUTIES & RESPONSIBILITIES:

- Design and development of automated reports.
- Monitor and report on financial performance of the company.
- Work with the Nordic Management Team on strategic business analysis about markets, client segments, products, profitability analysis, etc.
• Become a key engine in our business intelligence reporting and analyses to assist in informing and supporting business decisions with sound data.
• Actively coordinate the budgeting process and supporting analysis.
• Participate in improving other finance and accounting processes.

QUALIFICATIONS:
All applicants must possess the following:

• Very strong experience with/ mastery of Excel
• Superb numerical skills
• Well-structured and detailed oriented approach to work; an ability to distinguish important from unimportant information
• Very strong general business acumen (within and outside of Finance)
• Good presentation skills: strong experience with visuals like PowerPoint and verbal delivery
• A high level of quality and accuracy, thorough and precise work
• Proactive personality, who gets things done and before others realize there was a problem
• Strong Teamwork and collaboration skills, with the ability to also contribute individually
• Ability to meet deadlines
• Appreciation for fast changing environment
• Strong English language skills

Applicants possessing the following skills will have an advantage:

• Programming and Database management skill (VBA, SQL, SPSS)
• Financial modelling and business planning experience
• Experience with Microsoft based business intelligence software

We offer:

• Opportunity to be part of a Global telematics success story
• Opportunity to be an influential person collaborating with a multinational management team
• Excitement and experience of scaling a proved, successful product offering
• The security of a wide, trusted and recurring customer base
• Inspired, hardworking team, tackling challenges together one by one
• Support, to become successful in overcoming the challenges
• Career opportunity in a fast-growing company. Your career progress is limited only to what you deliver
• The role’s requirements may be met by graduates as well as experienced professionals. We offer a competitive package based on experience

Deadline: Until we have the suitable candidate.
